

HTML : — [HTML Basics-1]

DAY :- 01

Hypertext Markup Language

↓
Diff. pages
linked together
(one web page
is linked to
another page)

↓
annotations/tags
used to
markup content

→ What HTML
stands for.

Html :- Basic Building block.

↳ skeleton
↳ description of web page

→ What is HTML?

CSS :- formatting / appearance

JS :- functionality.

Html
doc

Browser
render

→ web page.

→ Why it is
needed?

#. Tags :-

⇒ It is an annotation which tells your browser, how to render different element

Eg;

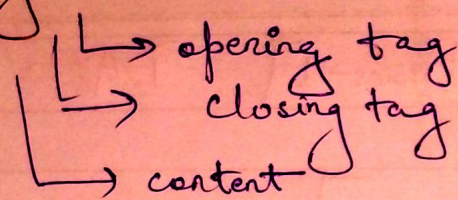

<p> → paragraph.

<h1> → heading

 → image

<a> → link.

Tag Consists :-

Element

Eg:- `<h1> Namaste Dunia </h1>`

Diagram showing the components of the tag:

- opening tag
- content
- closing tag

⇒ Comment :-

`<!-- blah -->`

⇒ HTML is not case sensitive.

⇒ HTML doc can be opened in two ways.

Text Element :-

→ 100+ html tags exist.
[Yaad mt kro -- google kro] :-

HTML text element

Block Element

para → `<p>`

heading → `<h1>` → `<h1>`

`<article>`

`<section>`

list → ``, ``

Inline Element

used to differentiate specific part

`` → emphasize

`` → Boldify

`<a>` → for links

Homework :-

MDN ^{doc.} website, [Explore]

⇒ Empty Tag → Self closing tag

Eg.,

`
`

``

`<input />`

Some tags :-

`<h1> Heading </h1>``<p> Paragraph </p>``
``<div id = "Ramesh"> This is div </div>`

Ans

`<dl>` → description list.
It includes `<dt>` → terms`<dd>` description
↓used for implementing a
glossary.

List :-

→ Ordered list

→ Unordered list

→ Description list → HomeworkCode :-`<!DOCTYPE html>``<html>``<body>`For ordered
list
↑For unordered
list
↑`<h1> Grocery List: </h1>```` Chini `` Peanut Butter `` Sugar Free ````</body>``</html>``<h2> 2nd Grocery List: </h2>```` Maggi `` Makkhan `` totu `

Attributes :- Property (provide additional info about element).

All html elements can have attributes.

id → all element
 class → all element
 src → img (only apply on)
 href → "a" tag (only apply on).

Code :-

```
<img
  src = "totulelo.jpeg"
  alt = "Tofu Picture"
  width = "100"
  height = "100"
/>
```

→ saved in desktop (name of img)
 → In case image can't be seen
 This will be shown
 text
 → set size of img.

Homework :-

What happens when we close an empty tag?

→ Invalid Syntax.

ABOUT HTML CODE.

<!DOCTYPE ~~html~~ ^{html}> tells your browser that it's HTML5.

<html lang = "en">
 attribute
 → tells content of web page is in English.
 [en - IN] → for Indian English.

<head> </head> → meta data
 → data of data
 Eg) <title>
 <style>
 <script>
 other.

<body> </body> → actual data.

meta tag → define meta data about HTML doc
 → always go inside head tag
 → used to specify
 → character set
 → page description
 → keywords
 → author
 → viewport

Expt. No. _____

Page No. _____

Date _____

[utf-8 - character Encoding (like ASCII)]

NOTE - 90% webpages uses utf-8.

NOTE - viewport \rightarrow area visible to your screen
width = device-width.
